

# Line Dance Level Breakdown

[www.ntadance.com](http://www.ntadance.com)

This list of dance terms per level was put together by the NTA members to use as a basic guideline for dancers and teachers and choreographers. It should be a big help for choreographers in assigning levels for their dances. It is important that a natural progression take place.

This is a guideline only. All dancers, teachers and classes are different, and what's intermediate for one group may be advanced for another. As with anything you learn...you need the basic information before you can move forward with more intricate details.

The terms listed are, by no means, every dance term available. The list includes some of the more common terms used in line dancing. Once you see the categories, you will have a better idea of where other terms would fit as well. Basic dance sheets should include just the fundamental patterns and should not be more than 48 or 64 counts.

## The breakdown is as follows:

**Basic** For dancers who are new to any form of dance.

**Novice** For dancers who have a basic knowledge of dance terminology. This is a good bridge between Basic and Intermediate, where steps may crossover from one level to another.

**Intermediate** For dancers with a solid knowledge of dance terminology, who are not new to dancing

**Advanced** For dancers, who have a solid grasp on dance terminology, can execute more complex steps and patterns with ease, and are able to perform more style-specific technique.

NTA LINE DANCE LEVEL BREAKDOWN					
BASIC		NOVICE	INTERMEDIATE		ADVANCED
Brush	Point	Balance Step	Boogie	Rond de Jambe	Arabesque
Bump	Replace	Ball Change	Boogie Roll	(Ronde)	Assemble
